Pendants

- ▶ Custom designed and fabricated to customer requirements.

The mining environment is extremely severe—one of the roughest you'll find anywhere. But Union's boom pendants are made to withstand it time after time.

Each structural strand boom pendant is produced with precise manufacturing techniques to overcome the harsh conditions found in your mining applications.

Union's galvanized structural strand for boom pendants features "Unit Lay Core Design." The unit lay design of the core utilizes a multilayer, single operation strand core. The single operation provides optimum wire support by maximizing the surface area between wire-to-wire contact.
