6x26 Tubing Line IWRC

- Compact construction
- Crush resistant
- Excellent fatigue resistance

The 6x26 WS features a compact construction with solid support for the wires; therefore it has a high resistance to crushing and well suited for tubing lines. Its number and relative size of the inner wires add to the stability of the strand and gives it excellent fatigue resistance. Since the “double fast line” is often used to speed up travel time of the main hoist during rod and tubing pulling operations, fatigue resistance is an important benefit.

When you purchase Union’s tubing lines, you get more than what meets the eye. Built in an ISO 9001 certified factory and backed by the industry’s largest staff of professional engineers, we do more than produce to spec.

Our quality begins with our raw material qualification process which suppliers must meet standards that are more stringent than industry. We then document rod coils through completion rope manufacturing for full traceability. We don’t stop there; the traceability continues into the field as each schedule is tracked to the customer. Throughout the manufacturing process we break test wires and tie that information to the coil and/or reel of rope. Thus ensuring we know the characteristics of the rope from its infancy and know it meets or exceeds our published strengths.

6x26 Tubing Line IWRC Strength and Weights Chart

Diameter (in)	Approx. Wire Weight (lb/ft)	Minimum Breaking Force (tons of 2000 lbs.)	
		IPS	XIP
3/4	1.04	29.4	32.4
7/8	1.42	39.8	43.8
1	1.85	51.7	56.9

Union, a WireCo WorldGroup brand, produces wire rope for a variety of applications – each with their own exacting specifications. We employ the most experienced, talented, licensed engineers in the industry to design solutions for your application. Eight WireCo WorldGroup manufacturing operations and seven distribution centers in North America, plus manufacturing facilities in Mexico, Germany and China, give our customers unparalleled support and global reach. Find out for yourself why Union wire ropes have proven themselves time and time again in the field. **Union: Tested, Tough & True.**
