

# Swaged Logging Rope

## SWAGED WIRE ROPES THAT ARE SUPERIOR TO THE STANDARD.

Union's **6 x 26 swaged ropes** offer greater strength when compared to standard ropes of the same diameter. Users also benefit from greater resistance to drum crushing, scrubbing and similar surface wear.

To enhance the performance of our swaged ropes in the field, we utilize a special wire chemistry in the outer wires of the strands. Then, during production, the ropes are rotary swaged to produce a **compact cross-section with minimum voids and greater surface area on outer wires** that contact drums and sheaves during operation.

In addition to **reducing surface wear**, Union's **6 x 26 swaged rope's** compact design also helps reduce wear to sheaves and will minimize crushing of the ropes on the drums.

Diameter (in)	Approx. wt/ft (lb)	Minimum Breaking Force (tons of 2000 lb)
3/8	0.31	9.1
7/16	0.42	12.2
1/2	0.55	16.0
9/16	0.71	20.2
5/8	0.96	24.7
3/4	1.32	35.3
7/8	1.70	47.8
1	2.22	62.0
1 1/8	2.66	79.3
1 1/4	3.47	97.5
1 3/8	4.20	117
