

LANKO[®] MINE D

SYNTHETIC DRAGLINE PENDANTS

Application: Dragline Main Pendants

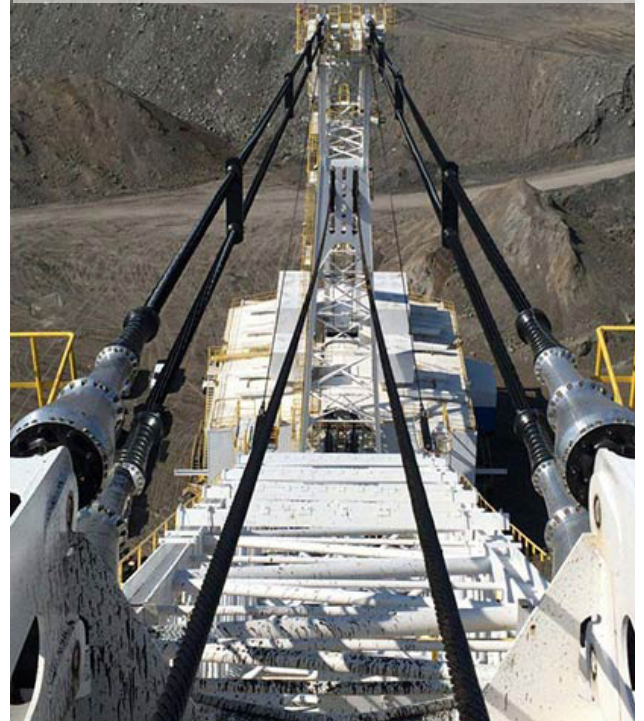

- ▶ Multiple ROI value propositions:
 - Increase dragline payload
 - Reduce boom compression and improve dampening
 - Increase dragline longevity by reducing target suspended load
 - Improve bottom line with extended lifespan by delaying boom drop and major maintenance
- ▶ Dyneema[®] DM20 fiber gives significant weight savings compared to structural strand
- ▶ Increased service life over structural strand
- ▶ Able to withstand tension-tension and bend fatigue
- ▶ Maintenance free, no lubrication
- ▶ Lighter, easier to handle during installation

Designed and manufactured by
Lankhorst | Ropes
