

SINGLE SHANK BALL MS-20664

The TUF-GRIP Single Shank Ball can be swaged at the end of your wire rope or at any point along your assembly. Please specify positioning at any such point by including a sketch when you order. Like the Double Shank Ball, our Single Shank Ball is manufactured according to MIL-DTL-781 specifications. Its standard material is stainless steel, grade 303Se or 305. Assembly length is measured to the end of assembly unless you specify otherwise. Please call if you require dimensions other than those shown.

SA664 FOR NON-MILITARY APPLICATIONS

Dimensions for Single Shank Ball

Dash no.	Rope dia.	A _S	B _S	C _S	R _S max rad.
2	1/16	.112	.190	.156	.014
